CAREER OBJECTIVE

Final-year CSE student at ULAB with hands-on experience in full-stack development, cybersecurity and blockchain systems. Seeking an AI Training & Software Development role at Outlier to leverage my code review, system testing and problem-solving skills in refining cutting-edge AI systems. Adept at writing verifiable evaluation criteria, identifying edge-case failures and improving code execution quality.

EDUCATION

B.Sc. in Computer Science & Engineering
University of Liberal Arts Bangladesh (ULAB), Dhaka
CGPA: 3.15 / 4.00

Expected 2026

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Network Security, Cryptography, Database Systems, Software Engineering, Blockchain Technology

Higher Secondary Certificate (HSC) — Science
Shahid Smriti Mahavidyalaya
GPA: 4.00 / 5.00

2021

TECHNICAL SKILLS

Languages: Python, C++, C, Java, JavaScript, Solidity

Web Development: HTML5, CSS3, JavaScript, React.js, Node.js

Blockchain: Solidity, Smart Contracts, DPoS/PBFT Consensus, Ethereum Testnet

Security: Threat Analysis, Threat Detection, Network Security & Defense, Encryption & Cryptography, Vulnerability Assessment, Cyber Security Administration

AI & APIs: Anthropic Claude API, OpenAI API, Prompt Engineering, AI Output Evaluation

Tools & Platforms: Git, GitHub, VS Code, Linux/Ubuntu, Wireshark

Networking: Wireless & Cellular Networks, Network Protocols, CIA Triad, Privacy & Data Confidentiality

PROJECTS

- **BlockExDSE — Blockchain-Driven Stock Exchange (Capstone)** — Designing a 3-tier hybrid blockchain architecture integrating edge computing for high-TPS, low-latency trading. Implementing a hybrid DPoS/PBFT consensus mechanism with MEV protection (commit-reveal, batch auctions) and off-chain storage to reduce compute overhead. Built with Solidity smart contracts on Ethereum testnet.
- **Novara Online — E-Commerce Platform** — Built a full-stack e-commerce website with product listings, shopping cart and smooth UX. Deployed at novaraonline.xyz. <http://novaraonline.xyz>
- **Memory Allocator — Resource Management System** — Developed a web-based resource allocation system to manage and schedule tasks efficiently with a structured, user-friendly interface.
- **Hospital Management System** — Designed a system for managing patient records and appointments, improving data organization and operational efficiency using structured databases.

- **Pani Entertainment — CMS Platform** — Built a CMS-based platform for an entertainment company with full cross-device compatibility.
- **SuperShop Inventory Management** — Java GUI application for real-time inventory management of retail stores, with add/edit/delete functionality and structured data handling.

RELEVANT EXPERIENCE & ACTIVITIES

- Worked with Anthropic Claude API and OpenAI API to build AI-powered applications; experienced in evaluating model outputs and writing structured prompts.
- Applied cybersecurity principles in academic projects: threat detection, vulnerability testing, network defense, and encryption.
- Active use of Git and GitHub for version control across all projects; familiar with code review workflows and branch management.
- Co-developing BlockExDSE capstone under academic supervision — involves reviewing system execution paths, refactoring smart contracts and testing for edge-case failures in consensus mechanisms.
- Trained in Digital Citizenship and Ethics — relevant to responsible AI development and data privacy standards.

TRAINING & CERTIFICATIONS

- Digital Citizenship and Ethics — Workshop (ULAB)
- CIA Triad & Cyber Security Administration — Academic coursework

LANGUAGES

- English — Professional working proficiency
- Bengali — Native
- Hindi — Conversational

PERSONAL INFORMATION

Date of Birth: 15 October 2004

Nationality: Bangladeshi

Hobby: Exploring & Meet with new people and place.

Location: 3 A/13 Salimullah Road, Dhaka – 1207, Bangladesh
