

PRISOM HALDER

Software Engineer | Full-Stack Developer | Back-End Engineer | Cybersecurity Enthusiast

prisomhalder2025@gmail.com | linkedin.com/in/prisom | whitesoulx.github.io/Portfolio | +88016010-031910

CAREER OBJECTIVE

To join an engineering team as a full-stack developer and build production software that real users depend on. I have shipped multiple live web applications end to end including a task management platform running on a Django REST API with JWT authentication and PostgreSQL and an e-commerce platform with a full checkout flow working across Next.js, React, TypeScript, Python and database design. My aim is to deepen my backend and system design skills in a team with strong engineering practice and grow into an engineer who can own a service from architecture to deployment.

EDUCATION

B.Sc. in Computer Science & Engineering — 2026

University of Liberal Arts Bangladesh (ULAB), Dhaka

CGPA: 3.15 / 4.00

Relevant Coursework: Data Structures & Algorithms, Database Systems, Software Engineering, Operating Systems, Network Security, Cryptography, Blockchain Technology

Higher Secondary Certificate (HSC) — Science — 2022

Shahid Smriti Mahavidyalaya

GPA: 4.00 / 5.00

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, Java, C++, C, Solidity, PHP

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Responsive UI

Backend & Data: Django REST Framework, Node.js, PostgreSQL, MySQL, REST APIs, JWT Authentication

CMS & E-Commerce: WordPress, Shopify, WooCommerce

Blockchain: Solidity, Hardhat, Smart Contracts, DPoS/PBFT Consensus, Ethereum Testnet

AI & APIs: Anthropic Claude API, OpenAI API, Prompt Engineering, RAG Fundamentals, AI Output Evaluation

Tools & Platforms: Git, GitHub, VS Code, Linux/Ubuntu, Vercel, Netlify, Docker (basics)

Security Fundamentals: Network Security, Cryptography, Vulnerability Assessment, Wireshark

PROJECTS

Live demos and source code for all projects available at github portfolio

Featured Projects

TaskFlow — Full-Stack Task Management Platform — *Next.js, Django REST Framework, PostgreSQL, JWT*

Task manager with Kanban and grid views, built on a Django REST API with JWT authentication and PostgreSQL persistence. Implements the full authentication cycle, task CRUD and shared state across views. Deployed on Vercel.

Novara Tracker — Project & Time Tracking Workspace — *TypeScript, Next.js, Authentication*

Members-only workspace consolidating projects, tasks and tracked hours into a single dashboard with protected routes and per-user access control.

BrightSmile — AI-Assisted Appointment Booking — *Next.js, AI Integration*

Dental clinic booking flow that reduces scheduling to under a minute using AI-assisted intake, with human confirmation as the final step.

After Noon — Restaurant Ordering & Reservation System — *Next.js*

Online ordering platform with order tracking and table reservation built for a Dhaka home-style restaurant.

Redline Auto — Multi-Language Service Booking — *React*

Auto-repair booking site with a service catalog and runtime language switching across the full interface.

SyncFlow AI — Workflow Automation SaaS — *TypeScript, Next.js*

Product site for a platform that converts natural-language commands into multi-service and CI/CD actions.

Capstone Project

BlockExDSE — Blockchain-Driven Stock Exchange — *Solidity, Hardhat, Ethereum*

Three-tier hybrid blockchain architecture integrating edge computing for high-throughput, low-latency trading. Hybrid DPoS/PBFT consensus with MEV protection (commit-reveal, batch auctions) and off-chain storage to cut compute overhead.

Freelance / Client Projects

Novara Online — E-Commerce Platform — Full-Stack

Full-stack e-commerce website with product listings, shopping cart and checkout, delivered and deployed for a live client store.

Pani Entertainment — CMS Platform — CMS, Responsive

CMS-based platform for an entertainment company with client-managed content and full cross-device compatibility.

Healthy Smiles Dental Care — WordPress

WordPress website for a dental practice, covering site structure, content architecture and responsive design.

Forge GYM — Fitness & Membership Site — Web App

Gym website handling multiple branches, membership plans and weekly class schedules.

NovaStack — Digital Agency Website — HTML5, CSS3

Landing and service site for a student-led agency offering web, software and AI solutions, focused on UI/UX.

Academic & Personal Projects

Memory Allocator — Resource Management System — Web Application

Web-based resource allocation system for managing and scheduling tasks efficiently through a structured interface.

Hospital Management System — Databases

System for managing patient records and appointments, improving data organisation and operational efficiency using structured databases.

SuperShop Inventory Management — Java, Swing

Java Swing desktop application for real-time retail inventory management, with full CRUD operations and structured data handling.

Python Creature — Python

Interactive Python animation rendering a creature that tracks and follows cursor movement in real time.

RELEVANT EXPERIENCE & ACTIVITIES

- **Freelance Full-Stack & E-Commerce Developer** — designed, built and deployed custom business websites and online stores (WordPress, Shopify/WooCommerce) for independent clients, owning the work from requirements gathering through to live deployment and handover.
- Built AI-powered applications on the Anthropic Claude API and OpenAI API including structured prompt design and systematic evaluation of model outputs.
- Developing the BlockExDSE capstone under academic supervision tracing system execution paths, refactoring smart contracts and testing for edge-case failures in consensus mechanisms.
- Use Git and GitHub across all projects with working knowledge of branching strategies and code review workflows.
- Applied cybersecurity principles in academic work: threat detection, vulnerability testing, network defense and encryption.

CERTIFICATIONS & LANGUAGES

Certifications: Introduction to Cybersecurity — Cisco Networking Academy | Python Developer — Sololearn Security — ASIA Center × Google via ULAB

Languages: English — Professional working proficiency | Bengali — Native | Hindi — Conversational

PERSONAL INFORMATION

Date of Birth: 15 October 2004

Nationality: Bangladeshi

Hobby: Exploring and meeting new people and places; video log creation

Address: 3 A/13 Salimullah Road, Dhaka – 1207, Bangladesh
